Managing your patches on PC

Creating folders

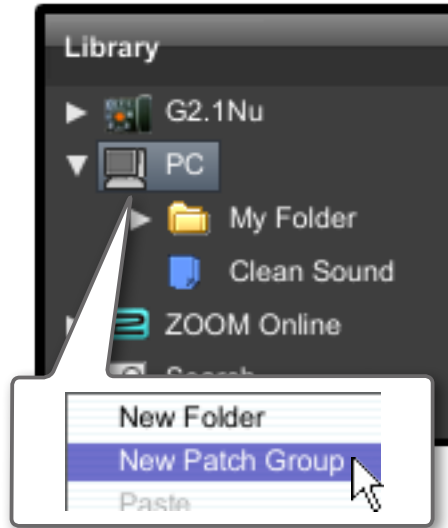

Right-click the icon, and then choose [New Folder].

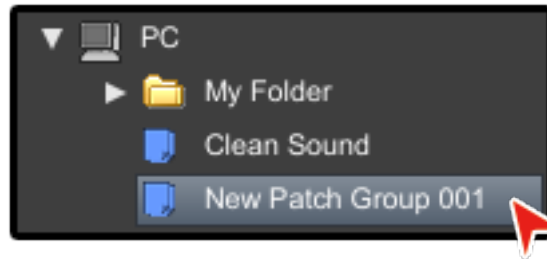

HINT You can use the action button() to perform edit operations.

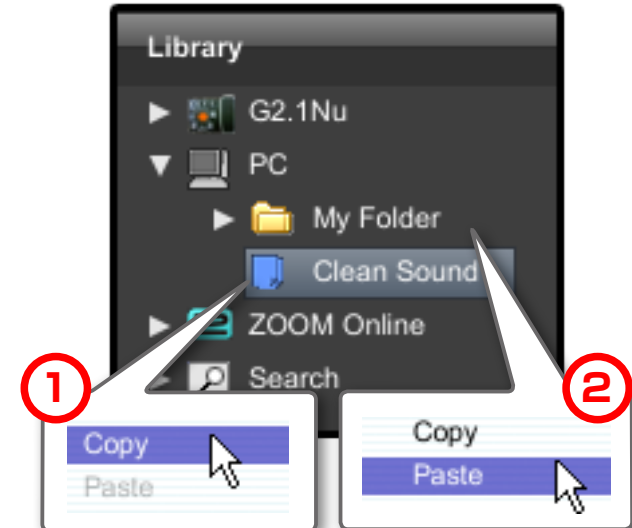

Creating patch groups

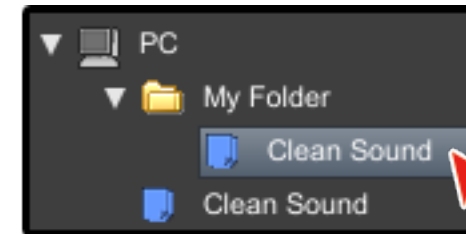

Right-click the icon, and then choose [New Patch Group].

Copying/Pasting patch groups

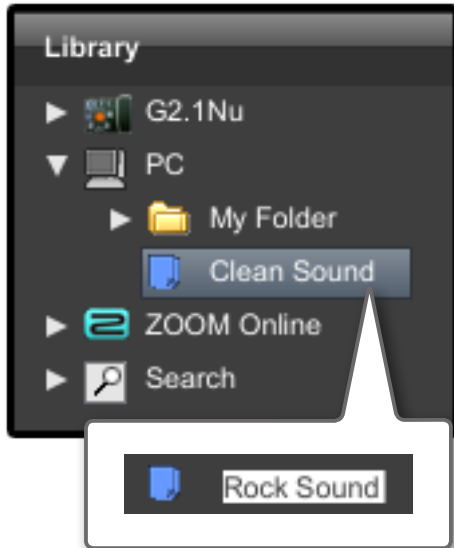

Right-click the icon, and then choose [Copy]. Right-click the icon, and then choose [Paste].

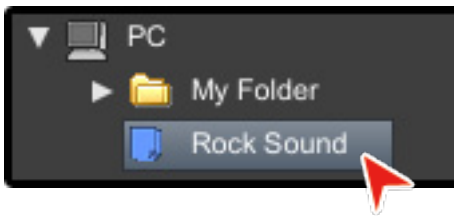

HINT You can move any patch group or folder under "PC" by performing drag and drop operations.

Managing your patches on PC

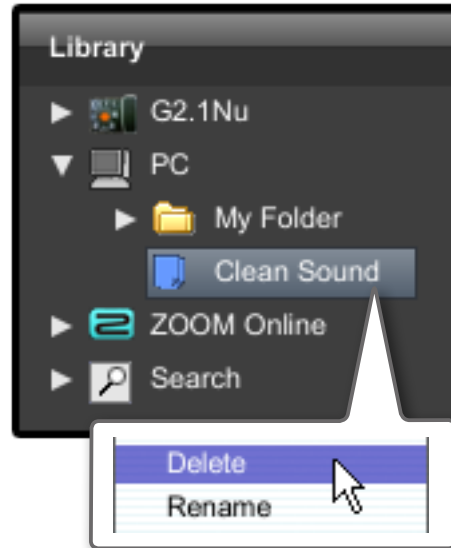

Renaming patch groups

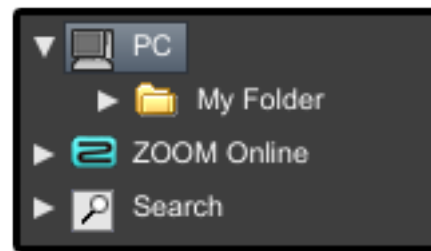

Double-click the patch group and rename it.

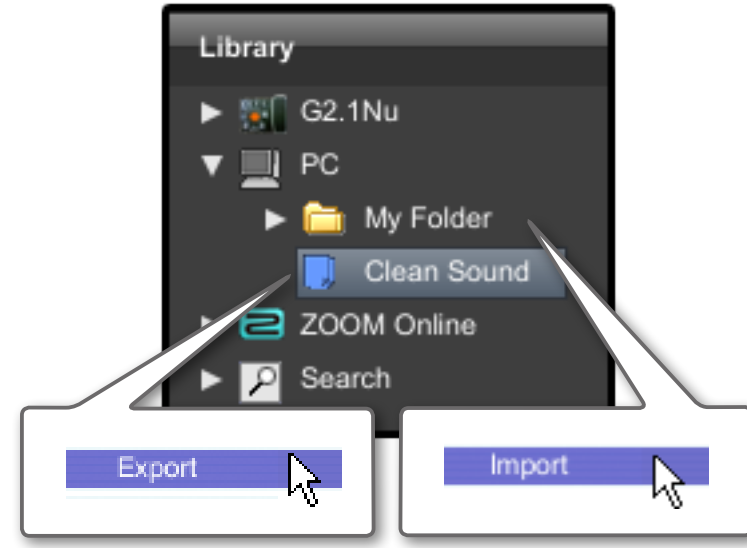

Deleting patch groups

Right-click the icon, and then choose [Delete].

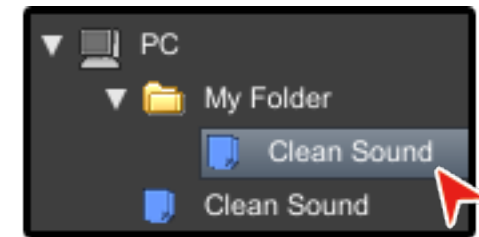

Exporting/Importing patch groups

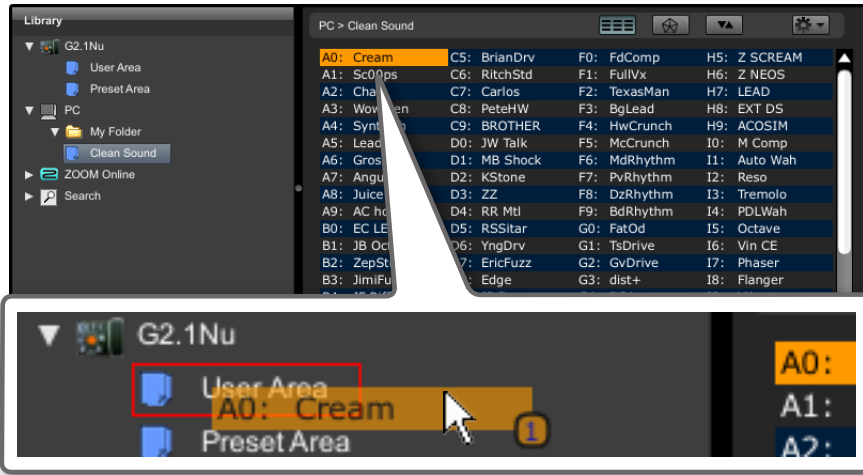

Right-click the icon, and then click [Export].

Right-click the icon, and then click [Import].

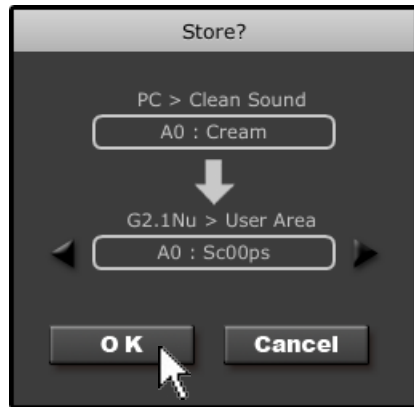

Copying patches from PC to device

Copying patches from PC to device

Drag a patch and drop it in the [User Area].

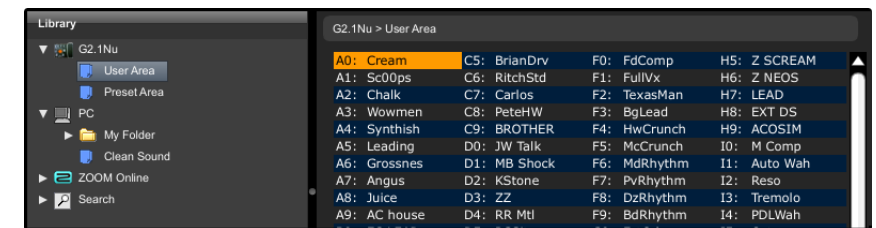

Click [OK].

HINT To work with multiple patches, hold [Shift] key or [Ctrl] key (on mac, [command] key), and then click the patches.

Copying patch groups from PC to device

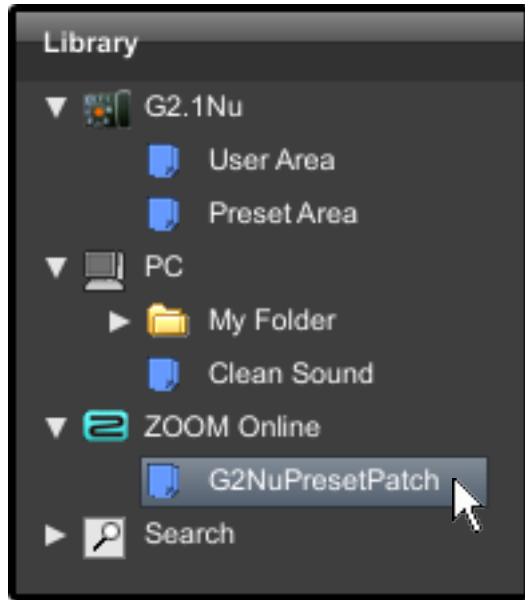

Drag a patch group and drop the patch group in the User Area.

HINT You can also display the right-click menu and then choose [Copy to ...].

Using the online patches

Accessing to the online patches

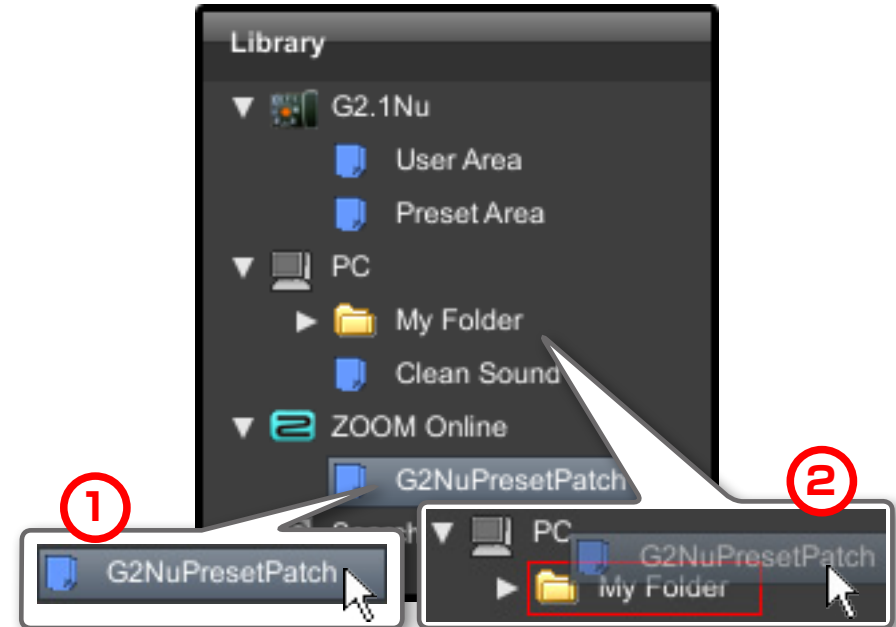

Click the patch group on ZOOM Online.

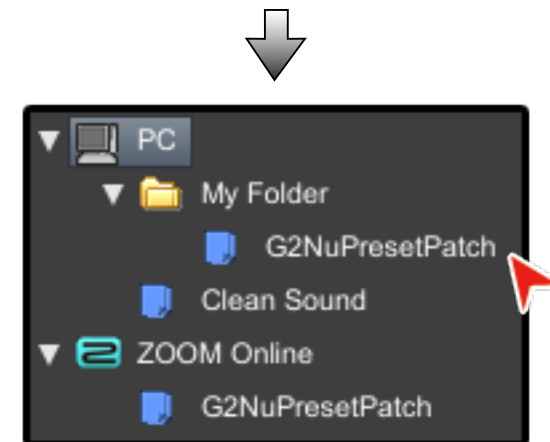

HINT You can access the folder on ZOOM Online via the Internet, and check the patches distributed by ZOOM.

HINT Patch groups on ZOOM Online cannot be edited or moved. To edit patch groups, you must copy them to your PC or the device.

Copying the online patches from ZOOM Online

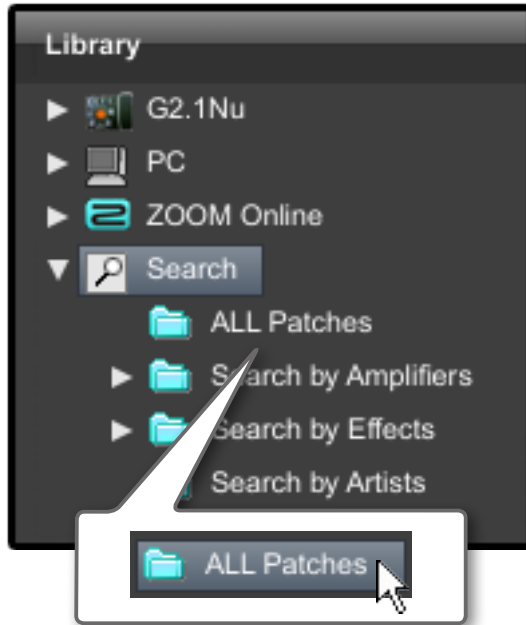

Drag the patch group and drop in the folder.

Searching for a patch

Displaying all patches

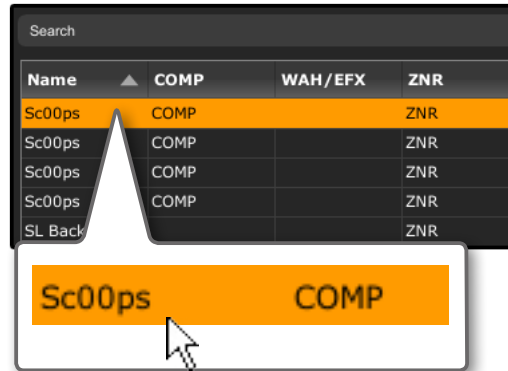

Click [ALL Patches].

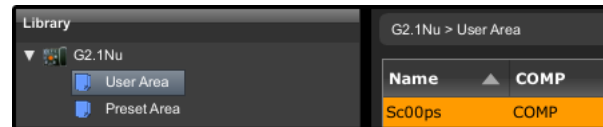

The screenshot shows the 'Search' window with a table of patches. The first row is highlighted in orange.

● No sound or very little sound is output.

- Confirm that the device and PC are connected via the USB cable.
- Properly connect the guitar to the INPUT terminal, and the headphone to the PHONE (or OUTPUT) terminal.
- Confirm that the shielded cable you are using works normally.
- To adjust the sound volume, turn the [PATCH LEVEL] knob in Edit&Share.
- Adjust the [Gain] parameter and [Level] parameter of the amplifiers and effectors used in Edit&Share.
- You can use the expression pedal to adjust the sound volume of certain patches. Adjust the pedal to achieve the appropriate sound volume.
- Adjust the master level of the device.
- Check the device settings.

● Noise stands out.

- Lower the [Gain] parameter and [Level] parameter of amplifier heads and drive effectors used in Edit&Share.
- Check the expression pedal settings. Depending on parameters assigned for the expression pedal, extreme changes to parameters caused by operating the pedal may result in noise.
- Make sure to check your peripheral equipment. Deteriorated, broken, or dirty connector terminals on the guitar or shielded cable may result in adverse performance.

● The USB terminal is not recognized when it is connected to the PC.

- Confirm that the OS supports the product.

● The effector does not work.

- Confirm that the effector is turned on (LED is lit.) Edit&Share screen.
- Check whether the device has been bypassed.

● Device does not get recognized correctly

- When the device list is improper, click the [Device]-[Connect]-[Refresh] menu to update the list.

● The device does not reply to Edit&Share while editing.

- Please restart Edit&Share if your computer has turned into sleep mode.
(Edit&Share does not support sleep mode. Please do not use sleep mode.)
