- *2ND QUALITY MERCHANDISE: What is the difference between 1st and 2nd quality? Our 1sts are all premium grade turnings, manufactured to tight tolerances. Our 2nds, while not the same as 1sts, are all hand sorted to insure good usable pieces. The primary reason for grading something 2nd quality is a slight roughness or discoloration in the wood. Many customers find them perfectly acceptable for most projects, at a price that can be 1/2 that of 1st quality. Supply is very spotty, so please call for availability. Items shown on our website are in stock.
