

**10ER table outfeed kit with
outfeed table insert plate!**

www.shopsmith10ER.com

10-ER shown with
table miter infeed and
outfeed extensions
with a 41 1/2" length.
No support post
needed. Outfeed
exceeds 50 lbs.

www.shopsmith10er.com

Outfeed table adjust left or right depending on the desired rip fence position.

10-ER table outfeed adapter **robust design** can be initially installed on the machine in minutes. The outfeed extension can then be on or off in seconds! No interference design and full capability.

The image shows a close-up, underside view of a metal outfeed adapter for a 10-ER table. The adapter is a rectangular plate with several holes and a central slot, mounted on a vertical support. It is tilted at an angle, demonstrating its flexibility. The background shows a workshop environment with a wooden cabinet and various tools.

10-ER table outfeed adapter
underside view shown tilted
as an example. Tilts **fully**
in either direction.
No extra supports are needed.

10-ER table
outfeed shown
shifted to the left
for rip fence.

Quick adjust in
seconds.
