Dreamweaver 8 Project 1 - True/False

Instructions: Circle T if the statement is true or F if the statement is false.

- T F 1. The application bar displays the application name, Macromedia Dreamweaver MX 2004; in brackets, the Web page title; and, in parentheses, the file path and file name of the displayed Web page.
- T F 2. Split view allows you to see both Code view and Design view for the same document in a single window.
- T F 3. A subfolder is a folder inside another folder.
- T F 4. The four main categories in a site definition are Local Info, Refresh Local, Enable Cache, and HTTP Address.
- T F 5. The Site Definition Wizard guides you through site setup step by step and takes you through a series of six screens.
- T F 6. Clicking the Reverse button on the Standard toolbar reverses the most recent actions.
- T F 7. Pressing the CTRL+F3 will collapse the Property inspector.
- T F 8. With the six levels of HTML headings, Heading 1 <1> produces the smallest text and Heading 6 <6> produces the largest.
- T F 9. Unordered lists typically contain text preceded by bullets.
- T F 10. To preview a Web page, click File on the menu bar, point to Preview in Browser, and then point to iexplore or your selected browser name.
