Date _____

Dreamweaver 8 Project 7 – Short Answer

Instructions: Fill in the best answer.

1. With _____, a Web page designer can place elements the user should always see, such as navigation buttons and title graphics, in static frames that do not change.
2. A(n) _____ defines the layout of the frames when displayed on the screen.
3. When creating a frameset, a(n) _____ provides a visual representation of how the framed window will display.
4. On the Property inspector, the _____ box specifies a width for all the borders in the frameset.
5. When a frameset is selected, all the borders of the frames within the frameset are outlined with a(n) _____ border.
6. The _____ check box of the Property inspector for a frame specifies whether the user can change the frame size by dragging the frame border.
7. You use the _____ to change, view, and set most frame properties.
8. To insert a flash button into a frame, click Insert on the media bar, point to _____, and then point to Flash Button on the submenu.
9. Frame names appear only in the _____ pop-up menu when you are editing a document within a frameset.

10. If your browser does not support frames, the _____ code takes you out of the framed Web site and into a non-framed version of the site.
