Dreamweaver 8 Project 9 - True/False

Instructions: Circle T if the statement is true or F if the statement is false.

T   F   1. The Flash command on the Media Pop-up menu places a Flash movie at the
              insertion point, using the <OBJECT> and <EMBED> tags.

T   F   2. Creating Flash files requires that a developer use the Flash program.

T   F   3. The Plugin command on the Media Pop-up menu places an ActiveX plugin
              control at the insertion point.

T   F   4. Flash movies end with .swf extensions.

T   F   5. When the Run on load check box in the Flash Property inspector is checked,
              the movie automatically plays when the page loads.

T   F   6. ActiveX is a set of rules for how applications should share information.

T   F   7. An ActiveX control is currently limited to Windows environments.

T   F   8. The Filename parameter in ActiveX controls links to a URL.

T   F   9. A dangling file is a file that is not connected to any page within the Web
              site.

T   F   10. The software that plays Shockwave movies is available both as a Netscape
               Navigator plug-in and as an ActiveX control.
