

# Electric Space Heat Rebates

Thank you for your commitment to energy efficiency

Confirm you're qualified

**You can:**

- 1) Contact an Energy Advisor at **1-800-562-1482** Monday through Friday 8 a.m. to 5 p.m.
- 2) Review rebates qualifications by category at [pse.com/rebates](http://pse.com/rebates)

**General Qualifications**

- Must be a current PSE residential customer for all of the following rebates.
- Rebate application must be submitted within 30 days of installation.
- Qualifying electric equipment must be installed in PSE's electric service area.
- Applies to existing single family properties only. Single-family new construction, multi-family (5 or more attached units) and commercial accounts are not eligible.
- Rebates only available on new, qualifying equipment.
- Cannot be combined with any other rebates except where noted.
- Must install to comply with all federal, state and local code requirements.
- Equipment that is replaced under warranty will not be eligible for second rebate.
- One rebate per qualified single-family residence.
- Rebate cannot exceed the pre-tax purchase price of any rebated product.

Fill out your account, name, address and home information

Account # (where equipment is installed)				Name (check payable to)			
Address (where equipment is installed)				City		State	Zip
Mailing Address				City		State	Zip
Email Address				Phone #			
Type of Home		Site-built	Manufactured	Year Home was Built		Home is a Rental	
Heating Type Prior to Rebate		Natural Gas	Electric	Oil	Propane		
Heating Equipment Prior to Rebate		Heat Pump	Baseboard/Ductless HP		Forced-Air Furnace	Boiler	

Select the rebate product(s) you are applying for and enter product information

Electric Home Heating		
Electric Forced-Air Furnace to Heat Pump Conversion (\$1,500)	Ductless Heat Pump [9.0 HSPF] previous heat source was electric resistance (\$800)	
Air-Source Heat Pump Tier 3 [10.0 HSPF/16 SEER] (\$800)	Ductless Heat Pump [10.0 HSPF] previous heat source was other than electric resistance (\$500)	
Heat Pump Sizing & Lockout (\$300)	Geothermal Heat Pump (\$1,500)	
Ductless Heat Pump Manufactured Homes (\$1,200)		
Product Information and AHRI Certificate (AHRI for Heat Pump Products Only)		
Indoor Heat Pump Model Number(s)	Outdoor Heat Pump Model Number(s)	AHRI Number (if applicable)

Attach a copy of your final installation invoice or receipt

**Your installation invoice or receipt must include an installation date, brand, model number(s) of all rebated equipment, and amount paid.**

- For Heat Pumps: Include the heat pump, air handler and/or coil model number on the invoice
- For Heat Pump Sizing & Lockout: **Include PSE sizing document with invoice**

Sign the terms and conditions

I acknowledge that the product(s) described above have been purchased and installed at the location indicated. I understand that PSE provides rebate incentives for measures that are designed to save energy but I acknowledge that estimated energy savings are not guaranteed and I understand that PSE has made no express warranties or representations with regard to these products or their installation. I acknowledge that I am responsible for meeting applicable code requirements, determining the adequacy of installation, and paying all amounts owed to contractors/suppliers. Further, I understand that this is a tariffed service and is subject to change or termination without prior notice. PSE reserves the right to inspect any installation prior to rebate approval and/or after rebate payment and I agree to provide PSE reasonable access for such purposes. I authorize PSE to release my customer account information, including my billing and energy usage information, to an independent, third-party evaluator solely for the purposes of evaluating this rebate program, confirming energy savings and for other quality assurance purposes. The disclosure of your private information will comply with PSE's privacy policy and state regulation.

# Electric Space Heat Rebates

Thank you for your commitment to energy efficiency

## Air-Source Heat Pump

- Heat pumps with a 10.0 HSPF/16 SEER rating are eligible for a rebate of \$800.
- Auxiliary heating sources do not qualify for additional rebate incentives (e.g., natural gas furnace).
- Can be combined with Heat Pump Sizing & Lockout Controls rebate.

## Ductless Heat Pump (previous heat source was electric resistance)

- Must be AHRI certified as mini-split heat pump, have an HSPF of 9.0 or greater, use inverter technology and be a minimum of 1.0 ton in heating mode.
- Must use electric resistance heat as primary source which includes electric zonal (baseboard, cable, wall heater), electric hydronic or electric forced-air-furnace.
- Must install at least one unit in the main living area of the home. Bedroom-only installations do not qualify.
- Customers with existing heat pump or natural gas service, even if only used for cooking, are not eligible.
- Customers who do not qualify for this rebate may be eligible for the \$500 Ductless Heat Pump (previous heat source was other than electric resistance) Rebate.

## Ductless Heat Pump

### (previous heat source was other than electric resistance)

- Must be AHRI Certified as a mini split heat pump, have an HSPF of 10.0 or greater, use inverter technology and be a minimum of 1.0 ton in heating mode.
- Must be installed in the main living area of the home. Bedroom only installations do not qualify.

## Ductless Heat Pump for Manufactured Homes

- Residence must be a manufactured home.
- Must have an existing electric forced-air furnace used as your primary heating source.
- Must upgrade to an air-source heat pump system that is AHRI Certified with an 7.7 HSPF/13 SEER rating or better.
- Customers with existing gas furnace or boiler are not eligible.
- Customers who do not qualify for this rebate may qualify for the Air-Source Heat Pump rebate if equipment meets qualifications.

## Electric Forced-Air Furnace to Heat Pump Conversion

- Must have an existing electric forced-air furnace used as your primary heating source.
- Must upgrade to an air-source heat pump system that is AHRI Certified with an 8.5 HSPF/14 SEER rating or better.
- Customers with existing gas furnace or boiler are not eligible.
- Can be combined with Heat Pump Sizing & Lockout Controls rebate.
- Customers who do not qualify for this rebate may qualify for the Air-Source Heat Pump rebate if equipment meets qualifications.

## Geothermal heat pump

- You must be a current PSE residential electric customer.
- You must install an ENERGY STAR qualified geothermal heat pump.
- Only one rebate is available per qualified, metered residential customer.
- This rebate is only available on new, qualifying equipment.
- Available to first time Geothermal Heat Pump customers only – customer cannot have an existing geothermal heat pump installed.
- Indirect water heaters installed off Geothermal Heat Pump are NOT eligible for additional rebate incentives.

## Heat Pump Sizing & Lockout Control

- Propane or natural gas furnaces installed as auxiliary heat are not eligible.
- Customers with an existing air-source heat pump or installing a new air-source heat pump must provide PSE sizing documentation completed by a qualified contractor indicating system is properly sized for the home.
- Newly installed air-source heat pump must be AHRI performance certified with an 9.0 HSPF/14 SEER or better.
- Existing heat pumps do not need to meet efficiency requirements but cannot be more than 12 years old.
- Heat pump lockout control must be set to 40 degrees F and heat pump must be set at 30 degrees F.
- Can be combined with Air-Source Heat Pump and Electric Forced-Air Furnace to Heat Pump Conversion rebates only.
