

Set Xpand!™ Content Location

Dear Digidesign Customer,

If you have manually moved the Xpand!.dat file to a different location on your computer, you must run the “Set Xpand! Content Location” application to tell the plug-in where to find its data.

Please follow these instructions to update the content location:

- 1** Put the Xpand! Content Location application next to the Xpand!.dat content file.
- 2** Double click the application to run it.
- 3** In the following dialog click “OK” to reset the file directory (hitting “Cancel” will abort without a change).

The next time Xpand! is used, the content should be recognized correctly.
